Dear Candidate,

Greetings from Diagnal Team!!

We have shortlisted your profile for Front End Developer position @ Diagnal

Sharing the company profile and Job description for your reference.

 Diagnal Technologies is a fully owned subsidiary of **Diagnal Inc, Hong Kong.** It's a product company focusing on media and entertainment clients, creating Video on Demand apps for their customers. We are a team of OTT video solution specialists helping our customers build the new digital media industry in Asia Pacific and beyond. We create viable revenue generating video streaming products, enable our customers to gain business and operational insights through big data analytics and empower them to engage with their users more effectively through targeted marketing campaigns. Started its Development Center in Technopark Phase III campus and focusing on Indian and International clients.

For further details please refer our website www.diagnal.com

LinkedIN : https://www.linkedin.com/company/6424075

Job Description:

- 1 or more years of experience of front end web based solutions in a project services or product engineering organisation
- Hands-on development experience using JavaScript, HTML, CSS, AJAX, JSON, jQuery
- Good working knowledge of JavaScript Frameworks especially ReactJS/Angular
- Experience with developing highly polished consumer facing websites with smooth interactivity and responsive behaviour directly from design assets
- Published sites that are now online
- Self motivation and ability to manage you own time to get the job done at the high international quality levels we expect
- An engineering Degree in computer science or equivalent practical experience
- A solid understanding of browser system fundamentals, application performance optimisation and backend integration
- Prior experience working within the Media, E-commerce, Telecommunications or similar large-scale consumer-facing industry

As part of our Hiring process, the Technical team had requested you to take the first round - Front End Programming test, which is actually representative of work we do in Diagnal.

PFA attached the file. Kindly go through the README document and work on the file.

Please complete this before **22 January 2019, before Eod**

 Please connect with HR team @ 9847020734 if you have any quire

Regards
Arun Kumar S

Hi Aravind,

This is Jeffrin. How are you doing sir? I got the task from Arun Kumar that to be complete on/before 22-Jan-2019. I have a question related to the task. Here are my questions,

1. Should the design be responsive or I should choose a fixed resolution and work based on that?
2. Can I use bootstrap like CSS frameworks to do responsive design or should I write all CSS on my own?
3. Is it compulsory to write code with any one framework like AngularJs or can I use simply the javascript and jquery to wite the entire code?

Thank you,
Jeffrin.John

Hello again Jeffrin,

You can use Angularjs/Angular2 to complete the project. Please do not use jQuery.

Thanks & Regards,
Aravind VS

Hi Aravind,

I have my complete test project done and hosted it in 000webhost.com.

Below is the link:
https://jeffrin-diagnal.000webhostapp.com/

I have also included the source file with this email. Please have a look at it too.

Thank you,
Jeffrin.John
